

NEW!
HW X2

Double Power for Building Heating & Concrete Work

HW X2 is a new generation mobile hydronic heating unit with over 200kW (682 428 BTU), that delivers up to 100°C hydronic heat, with an effectiveness rating of 94%.

Together with CliWi, a unique hydronic heat technology, this makes an innovative and environmental-friendly heating solution in construction industry.

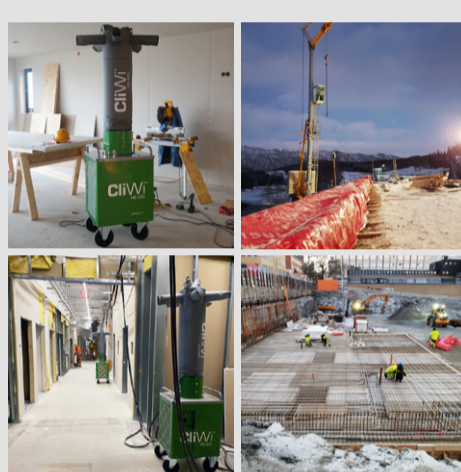

What makes HW X2 unique?

- Two independent internal systems in the machine make it possible to do several jobs at the same time
- Two independent temperature zones make the machine extremely flexible
- High pump capacity – more effective flow
- User-friendly – all controls in one place
- The machine can be delivered as aqua-system and as glycol-system

Areas of use:

- Building heating/drying
- Heat treatment
- Concrete work
- Damage restoration

HW 103

103 kW (351 450 BTU)

run up to **8 CliWi** units

1150 kg
(excluding diesel & generator)

1600 kg
(including diesel & generator)

heat buildings
up to **2500 m²**

concrete plat
up to **750 m²**

VS

HW X2

206 kW (702 901 BTU)

run up to **16 CliWi** units

1880 kg
(excluding diesel)

2130 kg
(including diesel)

heat buildings
up to **5000 m²**

concrete plat
up to **1500 m²**

CliWi – the award winning solution on the market for building heating, drying, heat treatment, damage restoration, and more.

- ✓ Low weight, Low noise level, High effect
- ✓ 100% environmentally friendly
- ✓ No danger of fire or explosion
- ✓ Ideal for smooth distribution of air

CHECK SOME OF OUR CASE STUDIES

Our customers uses our systems because they are concerned with health, safety and environment - combined with cost benefits.
